

Publication of GP Earnings

NHS England require that the net earnings of doctors engaged in the practice is publicised; the required disclosure is shown below. However, it should be noted that the prescribed method for calculating earnings is potentially misleading because it takes no account of how much time doctors spend working in the practice. It should not, therefore, be used to form any judgement about GP earnings, nor to make any comparison with any other practice.

The average pay for GPs working in Dr. Godfrey & Partners in the last financial year was £91,964 before tax and National Insurance. This is for 1 full time GP and 7 part time GPs who worked in the practice for more than six months.
